Founded in 1977, Commerce Controls, Inc. (CCI) has earned a reputation for excellence as a Turn-Key Control Systems Integrator. We provide services and solutions supporting a wide variety of industries & applications throughout North America. Leveraging technology, market strength, experience, quality and integrity, Commerce Controls is committed to delivering our clients industry leading solutions at an exceptional value.

Quality management is integrated into every aspect of our operations. We believe that our focus on quality adds value for both our customers and ourselves.

At the center of our operational philosophy is a business unit strategy. Each business unit has the responsibility to vigorously pursue their particular market to ensure that all projects are successfully sold, designed and delivered. CCI is structured and staffed to accept total system controls responsibility for projects from conceptual design, through manufacturing, startup, personnel training and maintenance services.

All control panels are assembled and wired by union electricians in our UL-508A & 698A certified manufacturing facility. Our wholly owned subsidiary Thermal Designs and Manufacturing (TDM) contributes an additional 30,000 sq. ft. fabrication facility providing a majority of our custom control enclosures ensuring prompt delivery and quality control.

Commerce Controls, Inc. is committed to remain at the forefront of technology and advance our resources to provide the best services for our customers. CCI consistently provides our customers with exceptional value through quality work.

Commerce Controls, Inc. (CCI) offers extensive process knowledge & technical expertise in providing Systems Integration and Process Control Solutions for Manufacturing and Infrastructure applications.

## Water & Wastewater Systems

- Freshwater Treatment and Distribution Systems
- Wastewater Collection and Treatment Systems
- Radio Telemetry and SCADA Systems

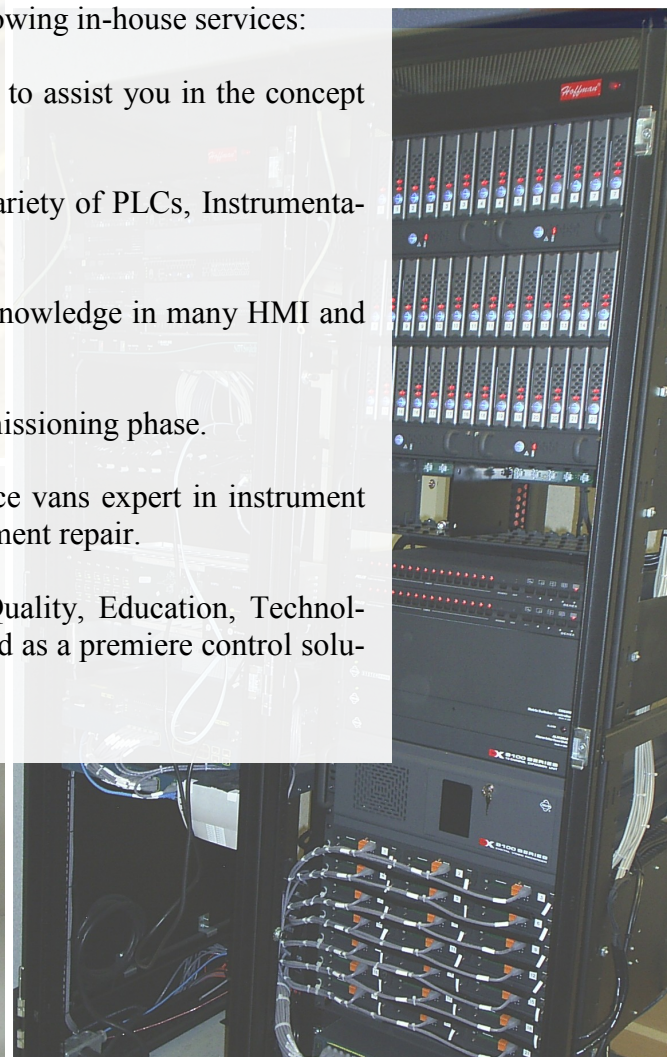

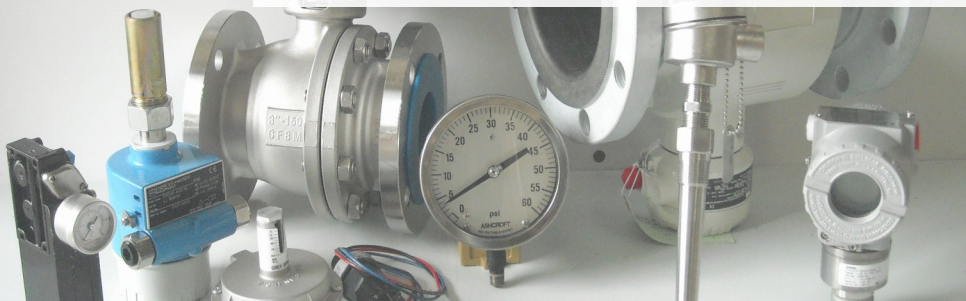

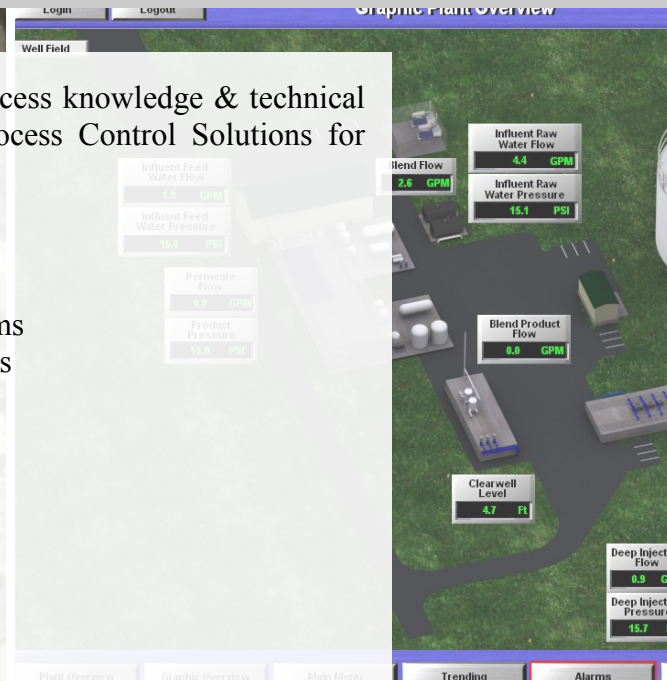

## Automotive & Industrial Process

- Paint Shop Process Systems
- Industrial HVAC Controls
- Utility Monitoring and Controls

In addition to our process expertise, we offer the following in-house services:

- A sales staff with the knowledge and experience to assist you in the concept and design phases of any project.
- Engineering and design staff skilled in a wide variety of PLCs, Instrumentation, and Software.
- An Information Systems staff that has intimate knowledge in many HMI and SCADA software packages.
- Field service staff to support the start-up & commissioning phase.
- Full-time service staff with fully equipped service vans expert in instrument calibration, preventative maintenance, and instrument repair.

Commerce Controls, Inc. commitment to Safety, Quality, Education, Technology, Delivery and Support has led us to be recognized as a premiere control solution provider.

# SCADA / Information Systems

www.commercecontrols.com

With the continuing evolution of technology and high-level integration, Commerce Controls, Inc. (CCI) developers keep abreast of the latest hardware, software, and networking advancements. The ability to control, monitor and troubleshoot a process directly through a terminal or an Internet browser, provide management the tools to monitor operational efficiency, downtime, schedules, and countless critical process variables.

CCI offers full-service network and information system integration including network design, application software development, database development, custom reporting software, plant monitoring & security systems, and web monitoring. We build information systems providing real-time data in a robust and secure environment. Today's plant operators, maintenance personnel and management depend on the interface between man and machine to ensure maximum productivity.

CCI integrated solutions utilize leading HMI, SCADA, MMS platforms. Our programmers and graphic developers have the skills and experience to develop interfaces from a single stand-alone operator panel, up to multi-plant, client server installations with multiple redundant servers and distributed view nodes on the plant floor. We have the skills and experience to deliver applications for all software packages and are certified Integrators for many of the leading software manufacturers.
